Overview of BHRS Substance Use Services

Overview – Behavioral Health and Recovery Services

- Marin County contracts out all substance use services, with the exception of one County-operated outpatient program.
- Marin DMC-ODS serves approximately 750 unduplicated Medi-Cal beneficiaries annually
- In CY 2019 and 2020, 49% of clients receiving substance use services reported a co-occurring mental health condition
- Substance Use Services supported by two State Contracts (Medi-Cal and Block Grant), as well as funding from Grants, Probation, MHSA and other HHS programs

DMC-ODS Overview

- In April 2017, Marin County opted into a five-year demonstration waiver to operate the Drug/Medi-Cal program as an organized delivery system. The intent of the DMC-ODS pilot was to demonstrate how organized substance use disorder care improves successful outcomes while decreasing other system health care costs.
- DMC-ODS will improve access to and quality of care for Marin Medi-Cal beneficiaries by:
 - Enhancing the **Continuum of Substance Use Disorder (SUD) Services** and expanding access to—and Federal Medicaid reimbursement for—services
 - Using the **American Society of Addiction Medicine (ASAM) Criteria** to ensure that beneficiaries are in the most appropriate level of care
 - Coordinating with **mental health and primary care** to ensure integrated care
 - Requiring providers to deliver care **utilizing Evidence Based Practices (EBPs)**
 - Expands **workforce capacity** by allowing licensed practitioners of the healing arts (LPHAs) to determine medical necessity and to direct treatment plans
 - Acts as a **managed care plan for SUD treatment** services
- DMC-ODS was renewed through 2026 as part of CalAIM

Expanded Programs & Funding

In April 2017, Marin became the third county in California to opt into a pilot program, referred to as the Drug Medi-Cal Organized Delivery System (DMC-ODS). The DMC-ODS functions as a managed care plan for the continuum of substance use treatment and recovery support services, which is modeled after the American Society of Addiction Medicine criteria. The DMC-ODS makes improvements to the substance use service delivery system, which are intended to increase successful outcomes for beneficiaries while decreasing other system health care costs. The DMC-ODS has been renewed through 2026 as part of the CalAIM initiative. For additional information, visit [DHCS DMC-ODS](#).
