## **PUBLIC HEALTH UPDATE**

May 26, 2021

### **COVID-19 Vaccine Access – Home Visit**

Dear Colleagues:

This update provides information about referring patients for home-based COVID-19 vaccination and requesting site-based COVID-19 vaccine clinics at congregate living facilities. Marin County Public Health has established a mobile unit to provide COVID-19 vaccinations at home for individuals with disabilities and transportation barriers and their caregivers.

#### **Current Situation**

Based on decreased demand, on May 28<sup>th</sup>, the County of Marin is [closing](#) its COVID-19 Call Center. Many Marin County residents used these call centers to access COVID-19 vaccine appointments, including home-based vaccinations. Moving forward residents who need assistance scheduling vaccine appointments will be referred to the California COVID-19 Hotline at 1-833-422-4255. Residents can also visit <http://getvaccinatedmarin.org> to find vaccine clinics scheduled countywide.

Healthcare providers can refer patients to Marin County Public Health for home-based COVID-19 vaccinations, if indicated.

In addition, administrators of congregate living facilities can also request mobile vaccination services to administer vaccines on site for unvaccinated residents.

#### **Actions requested of providers**

1. Identify patients who have not received their COVID-19 vaccine and determine if need for home-based COVID-19 vaccination (e.g., transportation barrier, disability).
2. Contact patients and confirm their interest in home-based COVID-19 vaccination.
3. Address individual concerns and [promote](#) vaccine confidence.
4. Refer patients ready home-based COVID-19 vaccination to Marin County Public Health <https://forms.gle/QXnp7Ht7toP8jAWE6>.
5. Congregate living facilities (incl. group homes, residential treatment centers, long term care facilities) can request site-based COVID-19 vaccine clinics <https://marincountyhc.iotform.com/210706280156045>.

Sincerely,

Lisa M. Santora, MD, MPH
