

Marin Community Clinics

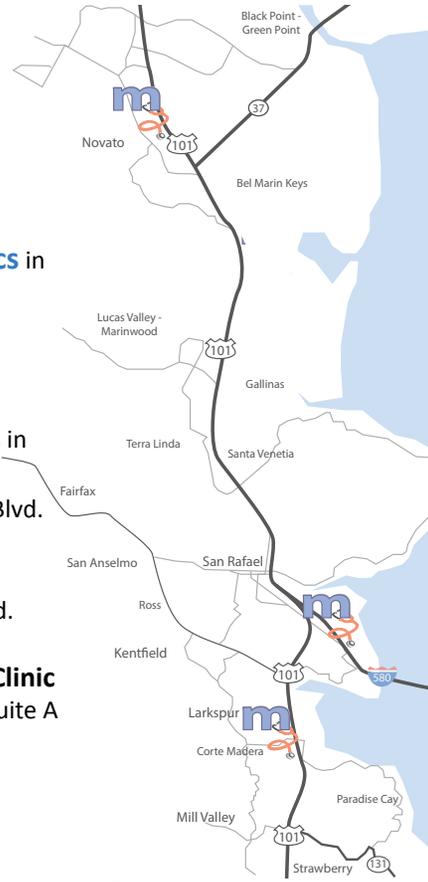

Services include dentistry, radiology, primary health care, behavioral health, obstetrics and gynecology, family planning for men and women, ophthalmology, chiropractics, and specialty care.

The presence of **Marin Community Clinics** means more children are receiving regular check-ups, oral exams and are immunized, adults are **healthier and more productive**, and medical and dental problems are addressed before they become expensive to treat or life-threatening.

Marin Community Clinics means a **healthier Marin** for everyone.

Marin Community Clinics is a multi-clinic network with a wide array of primary care, specialty and referral services. Of our 32,000 patients, 11,400 are dental patients, 80% of whom are on Medi-Cal and the remaining 20% are un-insured.

A Dental Health Home

As part of your dedicated healthcare team, Marin Community Clinics has three state of the art dental clinics with highly skilled caring dental staff

More than Dental Care

Did you know that your oral health offers clues about your overall health — or that problems in your mouth can affect the rest of your body?

When patients' needs extend beyond oral health, our dentists have the opportunity to refer them to other services and improve their lives as a whole.

Payment and Insurance

We welcome Marin residents who are insured through Medi-Cal/Denti-Cal or who are uninsured or under-insured for dental services. Most major credit cards, checks and cash are accepted.

What patients say

"When I first came to the Dental Clinic, I was scared," says 10 year old Carlos. "If I had to go to the dentist now, I would be happy because they are helping me."

"Marin Community Clinics has helped us a lot," Maria (Carlos' mother) concluded, "I got my teeth fixed and we have used the medical services, the pharmacy, the lab, and counseling services. Everything is good."

Dental Services

In-house adult and pediatric dentistry services:

- Cleanings
- Crowns
- Deep Cleanings
- Dentures
- Exams
- Extractions
- Fillings
- Pediatric Fluoride Treatments
- Sealants
- Single Root canals
- Urgent and Emergency Dentistry
- X-Rays

For more complex issues, specialty referrals are available to off-site providers and local dental schools as needed:

- Endodontics (root canals)
- Oral surgery
- Oral Medicine (labs & pathology)
- Orthodontics (braces)
- Periodontics (gums and bone issues)
- TMJ (jaw issues)

Pediatric Dental Prevention Care

- Bring your baby in for a dental exam when the first tooth appears.
- Learn how to prevent tooth decay and dental disease
- Begin the healthy habit of frequent dental care and get your baby accustomed to visiting the dentist.

Bravery Coach

Marin Community Clinics is here to help our patients deal with anxiety, fear and trauma, which can potentially delay dental work. Our behavioral team is here to help our dental patients once we identify that dental work is being compromised due to these external factors.

Dental Advocates

Babies need to establish a dental home from the moment the first tooth is seen. Our dental advocate makes sure that these young patients get referred from the medical to the dental clinic. Also, our advocates capture existing pediatric patients who are in need of a recall appointment.

Diabetes and Oral Health

Did you know that oral health and diabetes are inter-connected? Uncontrolled diabetes may lead to poor healing, promotes gum disease and other oral health problems. It is important to keep your blood glucose levels under control to keep a healthy mouth. Make sure you have a yearly oral exam to detect any problems early on.

Oral Surgery Program

The oral surgery program provides access to local oral surgeons for individuals, insured or uninsured, in need of imminent oral surgery. This program is made possible through a federal grant from the Human Resources System administration (HRSA).

Ryan White HIV/AIDS Program

This program provides a comprehensive system of care that includes primary medical care and essential support services for people living with HIV such as oral health who are uninsured or under-insured. Our dental clinics are proud to be a part of this program providing oral health to Marin County residents living with HIV/AIDS.

"Our prevention program is working. When people are able to get preventative care, sooner rather than later, that inevitably means less pain, less time off from work, and more time in school."

— Connie Kadera DDS, Chief Dental Officer
