

**MENTAL HEALTH SERVICES ACT  
PREVENTION AND EARLY INTERVENTION COMMITTEE**

**April 26, 2013 • 1:00-3:30 PM • Mtg #17**

**MINUTES**

**NEXT MEETING: Friday Sept 13, 1:00-3:00 pm. 3240 Kerner, Room 110**

**Participants**

Julie Baker, Ritter Center	Karuna Leary, MCHWC	Bonne Goltz Reiser, JFCS
Julia Chu, JFCS	Myra Levenson, Commty Mmbr	Marcus Small, CfRP
Paul Cohen, LAM	Vinh Luu, CAM/Asian Advocacy	Jasmine Stevenson, HYP
Elberta Eriksson, S Marin MDT	Nancy Masters, JFCS	Anita Strohmeier, CHA
Christina Fass, MCOE	Ricardo Moncrief, MCHWC	Maritza Saucedo, MCC
Seth Friedrich, CAM	Marisol Munoz-Kiehne, MHSUS	Carmen Tristan, Diff Response
Kristen Gardner, PEI Coord	Kathy Page, Canal Alliance	Sharon Turner, MCN
Jamie Goetz, CHA	Sandy Ponek, Canal Alliance	Kara Vernor, NYC
Margaret Hallett, FSA	Susan Quigley, HYP	Marty Zelin, MHB

**Meeting Purpose**

Improve our ability to convey the impact of PEI, on a program level and collectively on a county level.

- RAND Corp is assisting many counties to improve local PEI evaluations and align them with Statewide expectations.
- Much of today's meeting is geared towards developing logic models that will frame PEI evaluations in FY14-15. Some time at the end will be reserved for addressing current questions about evaluation.
- In FY13-14 RAND will be helping us align program objectives and evaluations with the logic model framework.

**PEI Statewide Logic Model                      Shari Golan**

*PowerPoint presentation attached.*

- An overview of the State PEI logic model, how it conveys the impact of PEI, and how it helps inform local logic models.
- In original MHSA legislation PEI is expected to impact Public Health Outcomes:

Prolonged suffering	Incarceration	Homelessness	School drop out
Foster care	Unemployment	Suicide	Disparities

Local programs do not need to collect data showing their impact on these outcomes, but logic models help to show how program activities and outcomes are expected to impact these outcomes.

**Marin PEI Logic Model                                      Kristen Gardner**

*Current draft attached.*

The previous draft was discussed at the March PEI Com meeting. The current draft incorporates the feedback provided then. Main changes (in italics on the draft):

- Representing primary prevention and wellness promotion efforts
- Representing increased access to MH services due to collaboration and reduced stigma
- Including the Public Health Outcomes defined in the MHSA legislation

**Program Logic Models**

- Programs identified where they fit on the Marin PEI logic model
- Programs with similar target populations and/or outcomes looked at how their programs combine to tell a bigger story about the impact of PEI

**PEI Program Evaluation Questions**

- Brief Q&A about tools, participation rates and other current issues.
- Tools shared by other programs:

### Outcome Rating Scale and Session Rating Scale by Duncan and Miller

These are both very brief assessments with some research to support them.

- Session Rating Scale: to assess alliance between client and provider, which is considered predictive of outcomes
- Outcome Rating Scale: can be used pre/post (or at every session) to assess change in clients following psychological intervention.

Coastal Health Alliance is using them for PEI clients.

### Suicide Risk Assessment Calculator

FSA's Suicide Hotline developed this tool with TA from Didi Hirsch to include in their iCarol data collection system.

*Tool attached.*
